Base plates are a special attachment system for daily use of HME filter cassettes or speaking valves. The self-adhesive LARYVOX® TAPES are selected individually according to the anatomical situation of the tracheostoma and the patient's type of skin in order to achieve an optimal wearing period. Each version of the base plates is equipped with a 22 mm adapter (KOMBI). Thus, a filter cassette can be fitted in place and changed if required – without having to remove the base plate. If an additional stabilisation of the trachea is required, the LARYVOX® TAPE can be combined with a special silicone tracheostomy tube (LARYNGOTEC® KOMBI CLIP or LARYNGOTEC® KOMBI CLIP LINGO). LARYVOX® TAPES are available in various shapes, materials, sizes and adhesive strengths.

The special skin preparation of the stoma region as well as the technically correct placement of the base plate on the tracheostoma are essential prerequisites for a good adhesion of the base plates. Furthermore, when removing the LARYVOX® TAPE, care should be taken to be gentle to the skin and to remove the base plate in a technically correct manner. Special accessory items such as OPTICLEAR® (plaster adhesive remover), OPTIGARD® (skin protection cloths) and OPTIFAHL® (stoma cleaning wipes) support the skin-protecting and professional changing of base plates.

**SHAPES OF LARYVOX® TAPE**

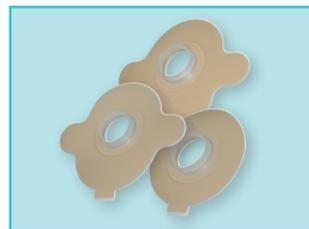

**SUITABLE BASE PLATE FOR EACH TYPE OF SKIN**

**LARYVOX® TAPE STANDARD**

- ▶ Transparent appearance with water-repellent effect
- ▶ Adhesive property ensures a secure hold around the tracheostoma
- ▶ Suitable for unproblematic tracheostoma anatomy and normal skin constitution
- ▶ Three different shapes available: round, oval, XL oval

**LARYVOX® TAPE HYDROSOFT**

- ▶ Hydrocolloid-based material that adapts flexibly to contours and is gentle to the skin
- ▶ Hydrocolloid encloses fluids/secretions in order to maintain the overall moisture environment of the skin
- ▶ Particularly suitable for sensitive skin
- ▶ Skin-friendly and gentle removal of the plaster
- ▶ Three different shapes available: round, oval, XL oval

**LARYVOX® TAPE COMFORT**

- ▶ Inconspicuous appearance: thin, breathable, skin-coloured material
- ▶ Highest possible adhesive properties
- ▶ High flexibility facilitates handling even in the case of difficult tracheostoma situations
- ▶ Adapts flexibly to the skin, thus enabling longer wearing periods
- ▶ Optimal for physical activity
- ▶ Three different shapes available: round, oval, XL oval

**LARYVOX® TAPE FLEXIBLE**

- ▶ Soft, textile-like material with high adhesive strength
- ▶ Special material property facilitates handling, particularly in the case of fixation in problematic tracheostoma situations
- ▶ Particularly suitable during physical activity owing to the good adhesive strength
- ▶ Three different shapes available: round, oval, XL oval

**LARYVOX® TAPE HYPOALLERGENIC**

- ▶ Particularly for sensitive skin
- ▶ Can reduce the occurrence of allergic skin reactions
- ▶ Adapts comfortably to movements
- ▶ Very good adhesive properties
- ▶ High flexibility and long wearing period
- ▶ Three different shapes available: round, oval, XL oval

**LARYVOX® TAPE EXTRA FINE**

- ▶ Unobtrusive appearance: transparent and extremely thin
- ▶ Very good adhesive properties
- ▶ Water-repellent material
- ▶ Covers a large skin area around the tracheostoma
- ▶ Adapts optimally to the movements of the neck region
- ▶ Shape: rectangular

**LARYVOX® TAPE CONVEX**

- ▶ Transparent appearance with water-repellent effect
- ▶ Suitable for precise positioning in the case of a deep or deepened tracheostoma
- ▶ Base plate as honeycomb core offers a strong overall structure
- ▶ Reduces the occurrence of allergic skin reactions
- ▶ Well suited for application with a finger-free speaking valve
- ▶ Shape: convex / oval

**ORDERING INFORMATION:**

▶ LARYVOX® TAPE STANDARD - ROUND	Pack of 15	REF 48100
